

# FALLING FILM EVAPORATION

It can evaporate materials with higher concentration and larger viscosity.

## SUPPORT EQUIPMENT

Industrial chiller

Electric steam generator

## SIDE DISPLAY

## Details

|||

### Stainless Steel

The Products are made of stainless steel, high temperature resistant, corrosion resistant and durable.

### The Controller

The equipment is easy to operate we will provide you with professional technical guidance.

### Reliable Sealing

The product has a good sealing can improve work efficiency, save time and cost.

## Technical Parameter

All components of the production process are strictly controlled for the best quality equipment for customers.

MODEL	FFE-200
Evaporation(L/H)	50
Falling film heater( m <sup>2</sup> )	3
Evaporative separator(L)	60
Steam water separator(mm)	200
Condenser( m <sup>2</sup> )	6
Recycling receiver(L)	50
Material balance tank(L)	100
Inlet pump(L/H)	1000
Discharge pump(L/H)	1000
